LETTER OF RECOMMENDATION

To Whom It May Concern,

It is my pleasure to write this letter of recommendation for **Biqiao Wang**. She completed a four-month industry placement with Christchurch City Council.

During her placement, Biqiao worked on a research project investigating the relationships between midge populations, wastewater quality, and weather conditions. The project generated valuable insights for the wastewater treatment plant, particularly into the environmental factors associated with midge populations and wastewater quality.

Throughout the project, Biqiao demonstrated strong capability in statistical modelling, data analysis, and data visualisation, along with solid technical skills in Python. She applied statistical techniques to identify key environmental factors associated with midge populations. She was responsible for data cleaning, analysis, visualisation, and reporting, translating complex environmental data into meaningful insights.

Biqiao consistently demonstrated the ability to manage complex datasets and apply appropriate analytical approaches. She worked independently, remained engaged with the project, and approached challenges in a practical and thoughtful manner. Throughout the placement, she demonstrated technical competence, analytical thinking, and a willingness to learn.

I would confidently recommend Biqiao for opportunities involving data analysis, environmental science, business intelligence, or related analytical roles.

Should you require any further information regarding her skills and experience, please do not hesitate to contact me.

Kind regards,

Joachim Schneider

Assistant Engineer, Christchurch City Council
